Convert json to go:

https://mholt.github.io/json-to-go

Wedbildto dat Mean Puledbildton

Stubby4j file structure:

stubby4j-5.1.1.jar weather.yaml city/

Start Stubby4j

>java -jar stubby4j-5.1.1.jar -d whather.yaml

City:

bangkok, hobart, nairobi, newyork and kupang

Extra points:

: use package

: for /weather/all time < 1.5 second

: logging for round trip
